

Introduction to Climate Science (11:670:102)

This course provides an introduction to the climate system. Topics addressed include the major mechanisms influencing climate, including Earth's energy balance, water cycle, and atmospheric circulation; spatial distribution of climate and climate classification; natural climate variability, including El Niño; past climate variations; and the carbon cycle and human-induced climate change.

Learning Goals

- (1) Understand and apply basic concepts in climate science.
- (2) Analyze the relationship that science and technology have to the social and policy dimensions of global climate change.

Technology Requirements

Should any health concerns require a temporary switch to remote teaching, this course will meet synchronously, with meetings held during the regular class periods. In order to attend this course during that time, you will need an internet/wifi connected device (e.g., computer, tablet, smartphone) with a camera. The device must be able to access Canvas and to run Zoom. All students are expected to attend synchronous sessions with their cameras on and to actively participate in group discussions and activities.

Grading

- | | |
|---------------------------|-----|
| 1. Quizzes (5) | 50% |
| 2. In-class exercises (5) | 50% |

Class Attendance

Attendance is not taken in this class, but the class is not too large to notice whether or not you attend. In borderline cases, students who demonstrate that they are trying their best by attending class regularly may be graded more generously.

Academic Integrity

Students are expected to understand and to act in accordance with the Rutgers Academic Integrity Policy:

Weekly Class Schedule

Modules in Canvas will be used to organize our weekly class materials. Lecture slides and other materials will be posted in the Module for that week after class.

Date	Topic
Week 1 1/18	Course overview; What is climate and how do we observe it?
Week 2 1/22 1/25	Scientific methods; Tools for studying climate: Physics, units, and statistics Composition and structure of the atmosphere
Week 3 1/29 2/1	Other climate system components: Ocean, ice, and land Quiz (2/1)
Week 3 2/5 2/8	Electromagnetic radiation In-class exercise: Climate statistics (2/8)
Week 4 2/12 2/15	Earth's energy balance Atmospheric circulation
Week 5 2/19 2/22	Earth's water cycle Quiz (2/22)
Week 6 2/26 2/29	Why do different places have different climates? Global climate patterns
Week 7 3/4 3/7	Natural climate variability: El Niño and the Southern Oscillation In-class exercise: Climates of the U.S. (3/7)
Week 8 3/11 3/14	Spring Break
Week 9 3/18	Natural climate variability: Other patterns of climate variability

3/21	Quiz (3/21)
Week 10 3/25 3/28	How climate can change: Forcing, feedback, and sensitivity In-class exercise: El Niño (3/28)
Week 11 4/1 4/4	Documenting past climate: Modern observations and natural archives Climates of the last millennium
Week 12 4/8 4/11	Climates of the more distant past: Warm and cold In-class exercise: Past climate (4/11)
Week 13 4/15 4/18	Human influences on the carbon cycle and climate Quiz (4/18)
Week 14 4/22 4/25	Tools for projecting future climate change Online exercise: Climate change according to ChatGPT Projections of future climate: Global responses and extreme events
Finals 5/2	Quiz (12-3 PM)

Note: Except for the dates of quizzes, this schedule may change slightly. Adjustments may be made based on our rate of progress through the material or if any classes are cancelled as a result of unforeseen circumstances.
